

Hi Rhett

Just a note to say thank you for your keynote address at the EEA Safety Workshop on Wednesday last week.

Your “no holds barred” presentation gave the audience the very stark reality of the personal consequences of a serious workplace accident and reminded us all of how suddenly and easily such accidents can occur.

Your post-accident can do attitude and personal commitment to making a difference in safety by telling your story was inspirational and was testament to the vital role leaders like you can play in improving safety performance in the NZ workplace.

We all appreciated the commitment you and your carer made to come to Wellington. I am spreading the good word on you presentation to companies within our industry and other industries as you have a story and message that must be heard. Hopefully we will meet up again in another safety forum in the future and until then best wishes for the future and keep up the great work!

Go the All Blacks!  
Kind regards  
Peter  
Peter Berry
