1 February 2011.

Mr Rhett Brown  
ACC Safety Speaker

Dear Rhett,

## Consequences of UNSAFE Actions

I would like to thank you for spending the time with us in December and giving the presentation of yourself as a living example of the consequences of a workplace accident.

While all of us are aware of industrial safety, to have you with the courage to stand in front of us and give your story of life after a major accident is very sobering and thought provoking. Your accident scene is all too familiar to us, the result of a fall from a relatively low height. Much of our work on the Lion Brewery Site occurs in pipe racks just above head height.

There is now no argument over the safety aspects of our work when we discuss a task with the construction crew. There is also an enhanced attention to safety during the days work.

I wish you well in the future, and know that you will get some encouragement from knowing that your message has helped my team to think and work a little harder at being safe.

Yours faithfully

Managing Director.
