

## The New Zealand REFINING COMPANY LTD

---

### Rhett Brown Testimonial

Rhett Brown was a special guest speaker for a 'Stop for Safety' meeting for Refinery staff and contractors at our Marsden point site in April 2011. We chose Rhett as we had heard great 'word of mouth' feedback regarding his presentation from colleagues within the Health and Safety community.

From the moment he took the stage Rhett kept us spellbound as he related his life experiences. His story was delivered in a 'matter of fact' style that led the audience to reflect on their own circumstances and more importantly their attitudes towards safety. Rhett's message was compelling and firmly in-line with our site's Health and Safety vision of 'Safely Home Every Day'.

Rhett's is a true story of courage, adversity, inspiration and he gives a warts and all account of what becoming a workplace 'statistic' truly entails.

Since his presentation, members of our workforce have commented on the power of his message - and many expressed his talk as being one of the most effective ever held on our site.

I would sincerely recommend Rhett to other organisations wishing to deliver a safety message with real impact.

Thank you Rhett for sharing your message with us.
